Wichita, Kansas 67202

Re: Resource Conservation and Recovery Act (RCRA)
Compliance Inspection

Dear Mr. Pretzel:

On August 3, 1982 an RCRA follow-up inspection of your facility was conducted by this department to determine compliance with state and federal regulations concerning hazardous wastes.

The inspection revealed the following items not in compliance with these regulations:

Personnel training documents and records must be maintained in accordance with 40 CFR 265.16. These records must include the job title and a job description for each position related to the management of hazardous waste, the amount and type of training to be given, and records of such training.

An inspection log must be kept in accordance with 40 CFR 265.15.

During the interim status period the TSD facility shall not exceed the design capacities specified in Part A of the permit application in accordance with 40 CFR 122.23(b)(3). You listed your design capacity at approximately 369 drums for the container storage area, but have now far exceeded that number. This backlog needs to be trimmed down to the 369 drums specified.

Our department will expect the above deficiencies to be taken care of within two month's receipt of this letter.

Your cooperation with the Hazardous Waste Management Program is appreciated. If you have questions concerning the inspection, please call me at 265-3181.

Sincerely,

DIVISION OF ENVIRONMENT
